SSBS-JAPFA collaborative IBH vaccine Project

We are working on isolation, characterization and development of a vaccine for Inclusion Body Hepatitis (IBH) virus, a project entitled “Isolation and Characterization of Fowl Adenovirus (FAdV) Associated with Inclusion Body Hepatitis (IBH) Virus as a Candidate Vaccine Strain”. This is sponsored by Japfa Comfeed India Private Limited, Pune, India. This study could be helpful for the prevention of IBH outbreaks that are happening in spite of regular vaccination in the poultry industry.
